

Saeed Ud Din Ahmad

AI Engineer | Software Engineer

✉ ahmadsaeeduddin@gmail.com |  LinkedIn |  Github |  Portfolio

EDUCATION

- **FAST National University of Computer and Emerging Sciences** August 2022 - June 2026
Bachelor's In Computer Science Islamabad, Pakistan

EXPERIENCE

- **Intellema** November 2025 - Present
AI Engineer Remote / Islamabad
 - Develop **Agentic AI** systems using **LangGraph/LangChain** and LLM-powered applications, integrating LLMs into enterprise workflows.
 - Design and implement **RAG (Retrieval-Augmented Generation)** pipelines for knowledge retrieval, contextual generation, and enterprise NLP use cases.
 - Develop AI backend services and APIs using **Python, FastAPI**, integrating AI models with application workflows.
 - Build **Voice AI** systems integrating speech-to-text, LLM-based reasoning, and text-to-speech for intelligent conversational agents and automated voice workflows.
 - Work across AI pipelines including **retrieval, tool integration, voice processing, automation, and evaluation.**
- **NESCOM** January 2025 - June 2026
Final Year Project / Research Collaboration Islamabad, Pakistan
 - Contributed to the development of a **real-time aerospace simulation and monitoring platform** in collaboration with NESCOM's Research & Academia Collaboration Department.
 - Integrated **Unreal Engine, Cesium 3D, geospatial terrain, flight dynamics, and environmental modelling** into the simulation system.
 - Researched and implemented **computer vision and real-time telemetry** for visual analysis and system monitoring.
 - Contributed to **operator dashboards, remote GUI, system integration, testing, and performance evaluation.**
- **Genesys Research Lab** June 2025 - August 2025
NLP / Gen-AI Intern Islamabad, Pakistan
 - Developed an end-to-end **NLP and Generative AI pipeline** for fake-news detection and claim verification.
 - Built workflows covering **article extraction, text preprocessing, claim generation, reranking, evidence retrieval, and verification.**
 - Integrated **LLMs, Sentence Transformers, and web-based evidence retrieval** for contextual fact verification.
 - Developed backend services using **Flask and FastAPI** for AI and model integration.
- **DSPORTSHUB** August 2025 - September 2025
Full Stack Intern Remote
 - Developed a full-stack Employee Management System using **React.js, Node.js, Express.js, and MySQL.**
 - Built responsive frontend components and integrated them with **RESTful backend APIs.**
 - Designed & managed DB schemas & contributed to end-to-end application development & system testing.

PROJECTS

- **Fake News Detection System**
Tools: Python, SentenceTransformers, RAG, FAISS, Groq (Llama 3)
 - Built an end-to-end pipeline using **Retrieval-Augmented Generation** to verify news claims in real-time.
 - Integrated web scraping and vector search to provide automated context retrieval and validation.
- **Autonomous Car Simulation**
Tools: Python, PyTorch, Scikit-learn, TORCS
 - Developed a self-driving system by collecting and processing sensor data into custom datasets.
 - Trained a **Neural Network** to predict steering and throttle commands for automated navigation.
- **MediGuide**
Tools: React.js, Python, AI/LLMs, OCR, Voice AI, SQL, FastAPI
 - Developed an AI-powered assistant that processes doctor prescriptions and extracts key medication, dosage, and usage information.
 - Generated simplified prescription summaries and personalized medication reminders based on prescribed schedules.
 - Integrated **Voice AI** to verbally communicate prescription summaries and medication instructions to users.

• **Management Systems**

Tools: C#, Java, JavaFX, .NET, SQL, MySQL, Windows Forms

- Built a **Retail Management System** for managing products, inventory, sales, and customer records.
- Developed a **Gym Management System** for managing memberships, member records, payments, and attendance.
- Built a **Student Attendance Management System** for tracking student attendance and maintaining academic records.

LEADERSHIP

• **Nimco**

Co-Founder & Operations Lead - Islamabad

March 2026 – Present

Islamabad, Pakistan

- Co-founded and scaled a donation initiative, raising **150,000+ PKR** and delivering **200+ meals** with full transparency.

• **Khanabadosh Explorers**

Co-Founder & Operations Lead

March 2024 – Present

- Scaled a student travel startup, successfully managing logistics for **10+ trips** with **300+ participants**.
- Handled vendor negotiations, budget management, and multi-disciplinary team coordination.

SKILLS

AI / GenAI: LLMs, Agentic AI, Voice AI, RAG, NLP, LangGraph, Langchain PyTorch, Sentence Transformers, FAISS

Backend & APIs: Python, FastAPI, Flask, Node.js, Express.js, REST APIs

Frontend: React.js, Next.js, JavaScript

Databases: PostgreSQL, MySQL, MongoDB, SupaBase

Cloud & DevOps: GitHub Actions, MLflow, Airflow, Docker, CI/CD, Prometheus, Grafana, LangFuse

Soft Skills: Team Collaboration, Event Coordination, Leadership
